

### LISTING OF THE CLAIMS

The listing of the claims provided below replaces all prior versions of the claims in the application. Please amend the claims as follows:

1-42. (Canceled)

43. (Currently Amended) A child seat for seating a child within a vehicle, the child seat comprising:

a base having a seating surface;

an armrest connected to the base on a side of the seating surface and positioned on the side of the seating surface;

wherein the armrest is adjustable along a straight line between a first height position relative to the seating surface and a second height position relative to the seating surface;

wherein the armrest includes ~~[[a]]~~ only one connecting portion that slidably telescopes relative to ~~fits into~~ a corresponding receiving portion of the base;

wherein the child seat is configured for placement on a seat of the vehicle;

wherein the child seat has a belt path configured to receive and locate relative to the child a lapbelt of a restraint system of the vehicle; and

wherein one of the receiving portion and the connecting portion includes a slot for receiving a tab located on the other of the receiving portion and the connecting portion.

44. (Currently Amended) The child seat of claim 43, wherein the receiving portion includes a second slot and wherein the first and second slots correspond to the first and second positions of the armrest.

45. (Currently Amended) The child seat of claim 44, wherein the tab is attached to a flexible portion of the connecting portion of the armrest thereby allowing the tab to disengage with the slot when the tab is depressed.

46. (Currently Amended) A child seat for seating a child within a vehicle, the child seat comprising:

a base having a seating surface;

an armrest connected to the base on a side of the seating surface and positioned on the side of the seating surface;

wherein the armrest is adjustable along a straight line between a first height position relative to the seating surface and a second height position relative to the seating surface;

wherein the armrest includes a connecting portion that slidably fits into a corresponding receiving portion of the base;

wherein the child seat is configured for placement on a seat of the vehicle;

wherein the child seat has a belt path configured to receive and locate relative to the child a lapbelt of a restraint system of the vehicle; and

wherein ~~the connecting portion of the armrest includes a pushbutton that engages one of a plurality of holes in the seat base~~ one of the receiving portion and the connecting portion includes a slot for receiving a protrusion on a resilient flexible tab located on integrally formed as part of the other of the receiving portion and the connecting portion.

47-58. (Canceled)

59. (Currently Amended) A child seat for seating a child within a vehicle, the child seat comprising:

a base having a seating surface defining a seat bottom;

a pair of armrests connected to the base and positioned on opposite sides of the seating surface;

wherein each armrest is adjustable along a straight line between first and second height positions and wherein a majority of movement of each armrest between the first and second height positions is vertically toward and away from the seat bottom;

wherein each armrest includes ~~[[a]]~~ only one connecting portion that slidably fits over a corresponding single receiving portion of the base;

wherein each armrest includes holes for receiving protrusions from the receiving portion of the base; and

wherein the child seat is configured for placement on a seat of the vehicle.

60. (Currently Amended) A child seat for seating a child within a vehicle, the child seat comprising:

a base including a seating surface;

an armrest having ~~[[a]]~~ only one connecting portion surrounded by, telescopically received in, and slidable relative to a receiving portion of the base on a side of the seating surface;

wherein the armrest is adjustable along a straight line in a vertical direction generally perpendicular to the seating surface;

wherein the armrest includes a tab that fits into a receiving ~~portion~~ slot of the base;

wherein the child seat is configured for placement on a seat of the vehicle; and

wherein the child seat has a belt path configured to receive and locate relative to the child a lapbelt of a restraint system of the vehicle.

61. (Currently Amended) A child seat for seating a child within a vehicle, the child seat comprising:

a base having a seating surface;

a pair of armrests positioned and connected to the base on opposite sides of the seating surface;

wherein each armrest is adjustable in a vertical direction and wherein armrest movement is substantially upward and downward relative to the seating surface;

wherein each armrest has ~~[[a]]~~ only one connecting portion telescopically movable over a receiving portion of the base received within the connecting portion;

wherein each receiving portion of the base includes a resilient flexible tab integrally formed as part of the receiving portion and protrusions on the flexible tab;

wherein the child seat is configured for placement on a seat of the vehicle; and

wherein the child seat has a belt path configured to receive and locate relative to the child a lapbelt of a restraint system of the vehicle.

62. (Currently Amended) A child seat for seating a child within a vehicle, the child seat comprising:

a base having a seating surface;

a pair of armrests each positioned on and connected to the base on opposite sides of the seating surface;

wherein each armrest is adjustable between first and second positions substantially toward and away from the seating surface;

wherein each armrest includes a connecting portion that fits around a corresponding receiving portion of the base;

wherein each receiving portion includes a resilient flexible tab integrally formed as part of the receiving portion and a protrusion on the flexible tab;

wherein each connecting portion includes first and second slots to receive the protrusion, the first and second slots corresponding to the first and second positions, respectively; and

wherein the child seat is configured for placement on a seat of the vehicle.

63. (Currently Amended) The child seat of claim 59, wherein the child seat has a belt path configured to receive and locate relative to the child a lapbelt of a restraint system of the vehicle.

64. (Currently Amended) The child seat of claim 62, wherein the child seat has a belt path configured to receive and locate relative to the child a lapbelt of a restraint system of the vehicle.
